

## REMARKS

The Specification has been amended to insert a cross-reference to the international application on which the present U.S. application is based.

Original claims 1-4 have been replaced by new claims 5-8, respectively, corresponding to claims 1-4 attached to the International Preliminary Examination Report.

New claim 9 corresponds to claim 5 attached to the International Preliminary Examination Report, except that it has been drafted in more conventional method of use format, and is dependent only on a single preceding claim. As a result, new claims 10-12 have also been added to the application.

Respectfully submitted,

Ingvar SELMER-OLSEN et al.
